

This is how you treat a lady.

Femininity HP™ is a combination of proteins, vitamins, and minerals, designed specifically to enhance the feminine qualities in female cattle. Developed for heifers and breeding cows by Dr. Jack McEwen, Ph.D and Ken Savell, this formula delivers increased appetite, rapid growth, increased feed efficiency, and improved overall health, while building superior feminine conformation and a taut, lean physique. Especially recommended for breeding animals, Femininity HP™ aids in conception and birth, while meeting and exceeding the demands of the show ring. Plus, we have fortified this formula with special hair promoters for an exceptional haircoat, and like all Oxy-Gen® products, Femininity HP™ is safe, natural, and drug-free, with NO WITHDRAWAL necessary.

Femininity develops the strong triangular form the judges look for

Femininity HP can help you build better heifers and breeding cows, too!

This heifer's neckline is dramatically improved in just 3 weeks
