

Stack the odds in your favor.

Success in Embryo Transfer (ET) can be challenging, not to mention an expensive proposition. There are dozens of factors and nothing is guaranteed. But you've taken the leap and are preparing your donors- what is the best way to proceed? You can stack the odds in your favor and get maximum success with our groundbreaking new product Mbryo+™, from the makers of the original Oxy-Gen® formula.

Mbryo+™ not only maximizes the number of embryos that you collect, it also maximizes the quality of those embryos, and that means greater success and greater profits for you. In recent studies we conducted, donors fed Mbryo+™ not only increased the number of embryos produced, they also showed an increase in the number of Grade 1 embryos and a marked decrease in the numbers of Grade 2 and Grade 3 embryos.

Mbryo+™ was tested over the course of 2 years with very stringent controls, and the data we collected proved to be truly remarkable. Here are the results of our studies.

Embryo Grade	Difference	% Difference
1	+2.55	220%
2	-0.3	92%
3	-0.7	42%

Of course, more Grade 1 embryos means more live births, and more live births translates into greater success and more money in your pocket. In our study, Mbryo+™ increased the number of live births by a whopping 55%! Typically, just one additional kid produced covers the investment in the product, and every additional kid is just greater profit for your business. Depending on your operation, your return on investment should be 8:1 or even 10:1! How can you afford to NOT use Mbryo+™?

- **PELLETED PRODUCT**
- **CONTAINS NO STEROIDS**
- **SAFE, NATURAL, & DRUG-FREE!**
- **MAXIMIZES VIABLE EMBRYOS**
- **INCREASES LIVE BIRTHS**

Guaranteed Analysis:

Crude Protein, min	15.5%
Crude Fat, min	1.8%
Crude Fiber, max	4.0%
Calcium, min	0.1%
Calcium, max	0.3%
Phosphorus, min	0.3%
Potassium, min	0.8%
