

Protect your investment!

With all the rain we've had in Texas and neighboring states, you know that fungus problems are sure to come. But you can prevent ringworm and other fungal issues before they begin with STOP!™ from the makers of the original Oxy-Gen®. STOP!™ utilizes Black Walnut and iodine to stop fungus dead in it's tracks. So protect your animals AND your family. Don't medicate- PREVENT fungal infections with STOP!™

STOP!™

FUNGUS

**NEW
PRODUCT!**

Full Stream™

Oxy-Gen® is proud to introduce another new product to help you protect your investment in your show animals! Designed to increase the absorption of calcium in lamb and goat wethers, Full Stream™ is perfect for animals prone to water belly and urinary calculi! And like all Oxy-Gen® products, Full Stream™ is safe, natural, and completely drug-free.

Full Stream™ was developed and tested in conjunction with Glen Martin of Mason, Texas, recognized as one of the leading showmen in lambs and goats in the USA. Glen and his family have the singular distinction of winning Grand Champion goats in FIVE out of the eight Major shows in the 2006-2007 show season, and Glen is the only showman to place animals of four species (cattle, goat, lamb, and swine) in the sale at Houston in the same year!
